## PREFACE

The user always looks for 'quality' of a product or service. 'Quality' is the user perception or image about the ability of the product or service to meet their requirements. Building up quality means building up this perception, which, in the long term gets correlated to the actual performance of the product/service.

2. Inspection is an important tool to ensure quality. Apart from compliance of prescribed systems and procedures, inspection should also check the efficacy of internal control system in the organisation, and mitigation of risks inherent in it. Top management commitment is central to quality improvement and this has to be a key inspection outcome.

3. At present, the inspection of Controller offices is being carried out by CGDA's office on the basis of the Inspection Drills in Questionnaire format. There is a need to re-orient the inspection methodology to identify risk areas and to strengthen the system and inspection procedure, so that it may indicate outcomes/deliverables by the Controllers to its customers.

4. Accordingly, the Inspection Questionnaire for Regional Controllers has been re-designed keeping in view the role and functions of the Auditee Controller. Part-I of the questionnaire covers the issues relating to Management Review and Part-II covers the points related to functions in the different sections.

5. The purpose of the new system is to internalise inspection itself as a control mechanism and to ensure that the officers and staff of Auditee Controllers are fully involved in the activity of inspection. External inspection will focus mainly on the commitment of top management of the Controllers office towards continuous improvement.

6. Quality is not static but dynamic in nature, warranting continuous improvement. So, this Questionnaire too is not a static document. It would evolve with time as we aim towards sustained quality improvement. Therefore, suggestions for further improvement are invited. Inspection Cell of HQrs. Office will be responsible for keeping the Inspection Questionnaire up-to-date with relevant/appropriate orders and Government of India instructions issued from time to time.

7. I hope that these efforts go a long way in achieving DAD's commitment towards efficient, correct and prompt accounting, payment and financial services leading to customer satisfaction.

## **REORIENTATION OF INSPECTION BY HQRS OFFICE**

Inspection of DAD offices at various levels (Referred to as “Controllers” hereafter), by CGDA HQrs. is carried out on the basis of the HQrs Inspection Manuals; the contents of which are not known to the organization being inspected upon. The observations of the inspection are thereafter allowed to linger under correspondence for years together; sometimes, defeating the very purpose of inspection. Since the inspection reports are voluminous action on them is often taken at the lower or middle management level at Controller offices, and adequate managerial attention is often found wanting. Moreover inspections are focused on compliance audit i.e. compliance of the procedures laid down from time to time. In the current scenario, this approach is no longer relevant and it is necessary to audit the effectiveness of the procedures themselves and address the gaps/risks.

### **2. OBJECTIVE OF THE INSPECTION:**

The objective of the inspection (also referred to as “Quality Audit”) of offices by HQrs is:-

- (a) to see whether the procedures running within the organization are necessary and sufficient to de-risk the organizational tasks (adequacy audit),
- (b) to ensure that procedures as prescribed are actually implemented. This is to be done by checking records for evidence quality checks performed thereon (Compliance audit).
- (c) to ascertain the degree of commitment of the top management towards not only compliance but also continual improvement.

### **3. The following steps may be taken to address the above objectives:-**

**3.1** The inspection manual for each organization type has to be converted into Question and Answer format. Additional questions too need to be framed for areas of risk if any, that have not been covered by the existing procedures so far. This will ensure tightening of procedures. These additional questions are required to introduce adequacy audit in the inspection. Unnecessary procedures too need to be eliminated from time to time.

**3.2** The inspection manual prepared as above will be circulated to all PCsDA/CsDA/PIFAs/IFAs offices. The JCDA or in his/her absence, another IDAS officer will be nominated as the Quality Manager in each office. He/She shall formulate internal inspection schedules based on peer audit. For these, 3 or more teams from amongst the staff of different sections headed by an SAO/GO level officer should be formed for conducting quality audit. For example, if X,Y and Z are Quality Audit groups, then X may inspect sections pertaining to Y. Y will inspect sections of Z and Z section may do inspection of X. Usually, the inspection may be done on quarterly basis but frequency can be reduced for well-compliant sections and increased for sections having poor compliance levels.

**3.3** Un-resolved points of these quality inspections will be put up to the Apex “Management Committee” for review. The Management Committee would be formed by Head of the organization. Quality Control officer would be Ex-officio Secretary and other members would be nominated by the Head of the organization. The following are the mandatory agenda points for discussion in the management review committee:-

**3.3.1** Results of inspection carried out, resolution of issues brought out therein.

**3.3.2** Customer satisfaction and feedback based on question & answer response, the number, type of complaints received during the period and those resolved.

**3.3.3** “Corrective” action points. Corrective action not only means correction of objected issues but also implies that they should not recur thereafter.

**3.3.4** Preventive Management issues: These arise from experiences from other offices and their prevention in the office in question.

#### **4 HQrs Office inspection would constitute:**

**4.1** Thorough check of the management review committee records supplemented by interviews with top and middle management to assess management commitment.

**4.2** Check of conformity and adequacy audits conducted by Internal Quality Control.

**5. Conduct of Quality audit/inspection:**

**5.1** There would be an opening meeting where ground rules would be explained by the inspecting authority and necessary liaison work, in order to ensure prompt production of document and travel/visit of inspecting groups within the organization, would be done. The method of inspection would be clearly explained to the auditee.

**5.2** After the opening meeting the actual inspection will be undertaken. In this inspection, the aim is to ensure action on deviant point rather than listing of objections and observation. The points raised/objection raised during the inspection should mostly be settled during the inspection.

**5.3** The closing meeting would be held at the end of the inspection wherein all concerned from inspected organization management would be present. During the meetings, un-resolved points should be read out by the inspecting authority for formal follow up and remedial action by the inspected organization. This is not an occasion for settlement of observations/objections.

**6.** The organization will be declared 'unsatisfactory' when the number of observations exceeds 10 and it would be liable for frequent future inspections. Where the compliance result is very good, inspection may be done less frequently.

**7.** Future inspections where scheduled, would be done soon after, the first quality audit has been conducted by the concerned office. The result of such audit may be given in a tabular form against each question of the inspection drill, after review by the Head of the organization personally. The HQrs inspection results should also be recorded in the next column against the question.
